Title: Kurosaki

Medium: Photoshop/Audacity

Size: 3100 x 2400

Statement: I started this project off by making something that resembles a poster or background on Photoshop, followed by effects that result in a glitchy look from an app called Audacity. As for the images that I used for this project, I happened to be inspired by an anime that I've watched called Bleach. I really appreciated my watching experience of this show as well as the artistic aspects of the show. Given that, I wanted to create an original artistic piece as my way of showing homage to the show.
